

Keeping in line with the topic done in General Awareness – Our House, in the month of October “ME CASA “Activity was organized for the children of class II.

Children creatively made different types houses using waste material. This not only engaged the children but also gave wings to their creativity.

Children also made huts by pasting sticks, hay, dry leaves etc. on cut outs, thus learning that about temporary houses and the material they are made of.

Temporary House (Stilt House)
